### Skills

---

20yrs in all phases of construction (foundations to finish), 25yrs building skateparks throughout Puget sound region. Proficient in construction management from field level to office. Heavily involved with project schedules, budgets, client interface, job set-up, logistics, etc...

---

### Experience

---

#### **Skanska USA Building Inc/ Assistant Superintendent**

June 2003 - PRESENT, Seattle, WA

Came up through the ranks from Apprentice, to Journeyman, Foreman, General Foreman, and Assistant Superintendent. Specialized in structural concrete form systems (specifically self-climbing core wall systems). 5+ years in healthcare at management level.

#### **Custom Pacific Homes/ Carpenter**

May 1999- June 2003, Monroe, WA

Building custom home foundations, including layout, forming, pouring, and stripping forms. Worked independently on multiple job sites and maintaining schedules/materials/etc...

#### **City of Bellevue Skatepark/ Assistant Manager-Carpenter**

August 1996 - May 1999, Bellevue, WA

Managed day to day operations of park, skate camps, and contest/events. Worked on design and construction/maintenance of skatepark and during various remodels.

#### **Various Skatepark Remodels/Contests/Demos/ Carpenter**

May 1996 - present, Puget Sound Region

Working with my close groups of friends which include Marshall Reid (EVO, Manik Skateboards), Micah Shapiro (Grindline), Eric Green (MSC Printhouse, Manik Skateboards), Dan Eyer (Alive and Well, GOODS, ATS), and Steve Gonzales (GOODS, Alive and Well, Sausage Skateboards), we built/remodeled/set-up most of the wood skateparks/demonstrations/contests in the area over the last 25 years. Past Parks/Events include:

ATS skatepark, Bellevue Skatepark, Raincity Skatepark, Skate Barn West, Vashon BARC, Sound and the Fury contest series, Warped Tour qualifying contests, many other various music festival/rave demonstrations.

---

**Education**

---

**Northwest Carpenters Union Apprenticeship/ Completed**  
**Bellevue Community College/ Associate Degree**  
**Newport High School / Graduate**

---

**Interests/About me**

When I have time for hobbies, they include rooting for local sports teams, woodworking, homesteading, community volunteerism, home improvement projects, and all board sports. I met my wife at the Eagles club (where she is the bar manager) while working on the Vashon High School project. We were married last summer and I am now a proud transplant islander. We have 4 kids together (Carter -7, Scarlett -9, Logan -11, and Bella -16).

# **BARC Remodel Phase 2**

**December 2018**

## **OVERVIEW**

Install a new top layer of Skatelite on all the ramps/structures at the BARC. Raise enough money to build a 3' micro ramp on the backside of the new 6' mini ramp.

## **PLAN SPECIFICS**

Two years ago, following a successful fundraising campaign, coordinated with BARC stewards Mark Brown and Dave Wilke, we raised enough money to purchase the materials to build a 6'x20' mini ramp. The second phase of this remodel was planned as a re-layer the mini ramp and as much of park as possible, based on the amount of material we could afford. Through networking and coordinating with Ryan Spence of Skatelite, we have procured a donation from Skatelite, which is based in Tacoma, of a much needed entire re-layer of all ramps in the park (**approx. 75 sheets worth over \$16k**). Using donated labor by my group of friends (see attached resume) that have been building local skateparks for 25+ years, we will get this final phase of the indoor park remodel done over the course of 5 days (Wednesday – Sunday, schedule TBD). Skatelite has agreed to hold the sheets for us to allow time for Parks Department to review our proposal and to approve an acceptable schedule for the remodel.

## **TIMELINE**

### **Prep/De-layer - Wednesday PM to Friday PM**

Park shut down Wednesday afternoon to begin removing top layer from all ramps/features.

### **Re-layer/Micro Ramp Build – Friday PM to Sunday PM**

Build micro ramp behind 6' mini ramp. Re-layer all features of the park. Repair any damages to underlayment or structures (minimal if at all).
