

Dear Prospective Third Graders,

As we are approaching the end of our school year and gearing up for a relaxing summer, it is important to keep our body and mind active. To keep you body and mind active, there will be a few tasks for you to complete over summer. The first few weeks of 3rd grade will consist of a quick math review; however, we'll quickly jump into multiplication and division early in the academic year. It is imperative for your success that you read all summer and complete required math.

The more you complete IXL this summer, the easier it will be for you to memorize your multiplication facts. Students login into www.ixl.com using their username and password. Students should practice *both* math and language arts skills.

Attached are recommended summer reading choice for students entering third grade. Students entering third grade are not required to do a book report, but it is important that they practice their reading skills. To encourage students to read, I've created a summer reading challenge. The five students with the most minutes read will receive a small prize the first week of school. Please use the Reading Log attached to record your book and number of minutes read. Reading Logs are due on the second day of school (august 15).

I hope you enjoy a blessed and peaceful summer!

Thank you,
Miss Moules
