

MAINTENANCE CREW NEWS

(News From the Pews)

Members of our Maintenance & Grounds Ministry have been busy volunteering their time to take care of our beautiful facility and grounds . . .

Hughes Hall floor and the hallways have been waxed and polished. We will tackle the kitchen next. All are welcome to check out the beautiful job.

We will be repainting the hallways as well as the All-Purpose Room & adding blinds to that space.

A small space in the school building that had been used as an office has been cleaned out and will be repurposed as a storage area for outreach collections (4C's, Mitten Tree, etc.)

Replacement of old, worn out outlets in the hallways and throughout the facility will be taking place. Special thanks to Rapid Electric (Bill Dick) for donating outlets. We're in the process of updating the outdoor outlets as well. The water heaters in the Rectory and the Parish Center were replaced.

The grounds crew is winding down. In addition to our usual mowing, trimming, and weeding, the field north of the buildings was graded to help with drainage issues. Special thanks to those who helped out with the grounds this past year:
