

My name is Sandy Yudith Guevara Sifontes. I consider myself a happy, restless, lively, independent and fighter distracted. Despite the obstacles that arise, I have the ability to face and overcome them. It is not easy, but I think that regretting situations does not help much. We must seek solutions and reach out to others to support us and to move forward, I know that I am resilient to the different situations in my life. Because there are good people in my life who believe in me, but I have learned to do my thing mostly, on my own.

Some of my hobbies:

See educational series, (at this moment I am seeing the good doctor), the Health area calls me a lot, in addition to the analysis that professionals from different areas have their private lives but that this cannot affect their work, I am one of the people who can see any kind of thing and I will always make a comparison of real life and return to the good of what

I see, I like to do that since I am clear about something and that phrase is very proper which says: " You learn from the bad and the good must be improved "since we are constantly learning, we must not see anything less useful, all of us just have to know when we are going to use that information.

Exercising I like this healthy and fit.

Having good conversations on different topics, since people, even if they do not have a professional career, have a lot of wisdom and things that we are not taught in educational institutions we learn from life.

I am drawn to extreme sports such as: climbing, amusement parks such as roller coasters, parachuting, camping , among others. From the aforementioned, I have only done the last, and I have done it because the university has taken us to some places due to evaluative activities of some chairs, I really like nature.

I study at the University of El Salvador studying 4th year of the Bachelor's Degree in Social Work despite the difficulties thanks to the Nuestra Señora de la Presentation Parish in conjunction with the CIS, we have a physical space where we can meet, since there is residential internet and technological equipment (computers). And these benefits, personally, I am taking advantage of them in a great way since I have a greater chance of receiving my classes and investigating in depth the topics that they provide me for homework. I thank God infinitely for belonging to this scholarship program and for putting it in my life, because thanks to you I can continue my higher education in a better way.

Tell them that last October 5, 2020, I had to expose together with my work team, in an open-chamber lecture on a respective topic. And with the authorization of the promoter, we met at the CIS house, since it was a debate, we were doing it against another team, the point is that we did our presentation well and the graduate congratulated us as a group because we had done it as we were He requested, it was to the only group that I congratulate him directly before the entire plenary session, I am not boasting but I do recognize that this was possible thanks to the fact that we have the space and the technological tools to be able to do it that way, he only wants the provision of us as students. That achievement was not only due to me or the work of my team, but thanks to you because we made it possible because we had the resources available thanks to your help towards us, as scholarship recipients. May God bless you greatly.

Thank you very much for supporting us because I am clear about something, each of the people who contribute financially so that we as scholarship holders can continue with our studies, so that our living conditions are better later and that we are good professionals with a humanistic sense and be in the constant struggle for social justice, to benefit the great majorities and not be individualists, perhaps the latter is not like that or yes, but it is clear that something, that they want to change our lives and that speaks very much of the excellent human beings that they are . I know that many of you do not know us in person just from photos and despite not knowing who we are, you support us, really thank you very much being in this scholarship program has positively impacted my life, not everything has been rosy, but I really hope you believe me when I say thanks to your support we have achieved many things, you are greatly appreciated.

I hope and God bless you greatly and that everything you do or undertake in your personal and work life is successful!!!

Blessings.
