

Miss Anne's News from Room 5

Week of May 10-14, 2021

We had a busy week talking about plants and how they grow! We planted different kinds of seeds and are observing how they grow. We also finished watching the process of metamorphosis as our 7 Painted Lady caterpillars grew, became chrysalids, and emerged at beautiful Painted Lady butterflies. On Wednesday, we wished them well and released them into the garden.

This coming week we will learn about all of the other Creepy Crawlies that we are beginning to see. We are observing some ant colonies in our garden, and see some small stinkbugs on the playground! We will learn about bees, crickets, beetles, spiders, and ladybugs, too!

We are all so happy to congratulate Autumn and her family as they welcomed a new baby sister, Emery, this week! We can't wait to meet her in person!!

I am currently working on the final progress reports of the year, which will go home the final week in May.

I wish all of our very busy, hard working mommies a very restful and Happy Mother's Day! I have told all of your littles to spoil you rotten this weekend!! (PS—Your gifts are breakable, so pick them up carefully!!)

Have a great weekend! — Miss Anne
