

Goals for the 1992 Annual Catholic Appeal were set using the following guidelines:

1. Parish goals are targeted at 20% of regular parish income.
2. If the parish goal was below 20% for 1991, the 1992 goal was moved toward 20% by increasing the goal one percentage point. Example: 1991 goal for parish "B": was computed to be 17% of regular income; 1992 goal is based on 18% of regular income.
3. If the 1991 parish goal was above 20% of regular income, and that same amount is above 20% of regular income for 1992, the parish goal will remain the same as last year.
4. If the parish had bequest or other contribution income greater than 5% of the reported regular income, the bequests and/or other contributions were deducted from the reported regular income. The goal was computed on the adjusted income, and .5% of bequest and/or other contributions was added to the new goal.
