## Interview with Our New Development (Cont.)

### Why did you choose to work at OLPH Catholic School?

My children are my why. My career began in healthcare after graduating college. When the opportunity arose to use my gifts and talents at the school my children attend, I took the leap. I have over 10 years of experience in marketing, medical billing, and management. Although education is a different platform than healthcare, the concepts are the same. It is easy to be passionate about such an amazing school filled with dynamic educators and staff. As a parent I always knew my children were part of something special; however working on this side confirms it. Our staff cares about each student and their success individually. I feel both grateful and blessed for the opportunity to join this team.
