Holy Name of Mary is a Roman Catholic community of believers who are dedicated to know Christ and become Christ, each one, for the sake of all. As disciples, we are called to create an environment where God is worshiped and where we serve our neighbor. Our warmest welcome to all who celebrate the Eucharist with us! We thank God for your presence at Holy Name of Mary and we pray for you and your families.

A true Eucharistic miracle takes place at every Mass when the priest says the words of consecration; the bread and wine become the substance of Jesus’ Body and Blood.

But there has been another kind of Eucharistic Miracle (reported since the 8th Century). We’ll look at a recent, and scientifically studied, one now. On August 18th, 1996, at the church of Santa Maria y Cabalito Almagro in Buenos Aires, Argentine, Fr. Alejandro Pezet discovered a consecrated host that was discarded. Because it was dirty he could not consume it, but placed it in a small container of water in the tabernacle to dissolve it (which usually takes only a few days). When Fr. Pezet opened the tabernacle a week later, on August 26th, the host had transformed into a piece of bloody tissue much larger than the original host. He informed Archbishop Jorge Bergoglio (now Pope Francis) who asked that it be professionally photographed.

After three years, without any attempt to preserve it, the bloody tissue has not decomposed (which is scientifically unexplainable). In 1999, in the presence of the then cardinal Bergoglio, a sample of it was sent by Dr. Ricardo C Gomez to New York to be scientifically examined. He did not reveal the source of the sample to the lab. The lab found that the sample was a piece of a heart muscle found in the wall of the left ventricle close to the valves. This muscle is responsible for the contraction of the heart which sends blood to all parts of the body.

A large number of white blood cells penetrated the tissue, meaning that it was under severe stress, as if the owner had been severely beaten on the chest. Because of this, the sample was thought to be taken from a live human heart.

These findings eliminate many kinds of fraud; it can’t be thought that Church officials authorized the torture and death of a male with AB positive blood type (the same as was found on the Shroud of Turin) opened his chest while he was still alive, and removed the tissue from his beating heart.

This miracle supports the Catholic doctrine that, during Mass, the bread and wine become the Body and Blood of Jesus Christ.

Four aspects of the Catholic Church have been lost by many other Christian Churches:

1) The real presence of Jesus in the Eucharist, and the graces received from it.
2) An absolute authority to guide us to the truth of Jesus and prevent division.
3) A rich intellectual tradition (philosophical, scientific, literary, and political).
4) An extensive spiritual tradition (including the Sacraments, liturgy, retreats, religious life, pilgrimages, devotions to the Eucharist, Mary and the Saints, and holy objects).

Fr. Nelson Couto
