

Six Things Every Ob/Gyn, Family Doctor and Pediatrician Should Know.

1. Facts about Oral Contraception: Health Risks and possibility of abortifacient effect. OneMoreSoul.com "Problems Associated with Hormonal Birth Control"; "What a Woman Should Know About Birth Control"; "Alternatives to the Pill"

2. The value and availability of Fertility Awareness Based Methods of family planning.

- where to refer for further information:

naturalwomanhood.org/fertility-awareness-methods

3. The value and availability of NaProTechnology to use cycle awareness and other methods to treat reproductive problems, including infertility (with better results than IVF) and no moral issues as IVF has with the destruction or loss of many embryos for each one born. <https://naprotechnology.com/>

4. Option Line as a resource to refer anyone who is distressed to be pregnant, considering abortion, or being coerced to abort.

OptionLine.org / 800-712-HELP 24/7, Eng/ Span

- Cards to refer to web site / phone number available from hh76.org

5. The possibility of Abortion Pill Reversal to rescue a child after the abortion pill has been taken. (AbortionPillRescue.com / AbortionPillReversal.com / 877-558-0333;

- cards to refer to web site / phone number available from hh76.org

- learn how to administer the remedy and [be a resource for others](#).

6. The need and availability of post-abortion healing ministries:

Physical and Psychological Risks of Abortion :

<http://theunchoice.com/resources.htm>

Immediate conversational support and referral to local ministries at

OptionLine.org
